

Large Majority of 2017 IPOs were One Share, One Vote

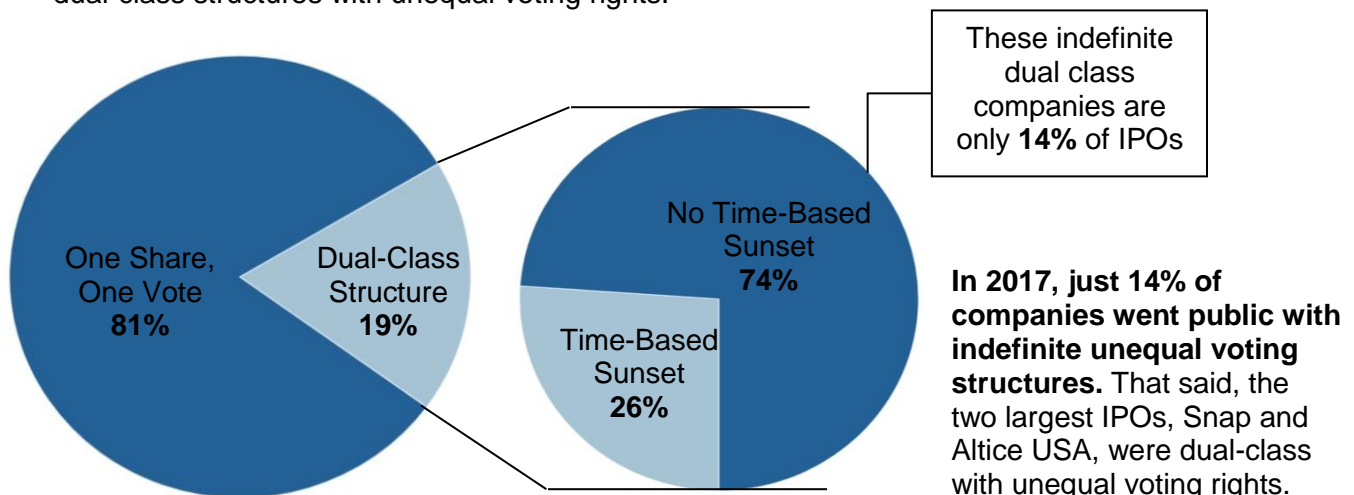

CII's tracking of the IPO market in 2017 shows more than four in five companies continue to go public with a one share, one vote structure.

Last year, a total of 195 companies went public on U.S. exchanges. Of these, 45 were foreign private issuers (FPIs), 20 were special purpose acquisition companies (SPACs), and six were master limited partnerships (MLPs).

Of the remaining 124 IPOs (excluding FPIs, SPACs, and MLPs):

- **101, or 81%, were one share, one vote.**
- 23, or 19%, had dual-class structures with unequal voting rights.
- Four, or 3%, included non-voting shares in their structures: Snap, Altice USA, Blue Apron and Cadence Bancorporation. Snap is the only company that has actually issued non-voting shares to public investors, and no IPO with non-voting structures has occurred since Blue Apron's IPO last June.
- Six, or 26% of dual-class IPOs, will phase out their unequal voting structures with time-based sunsets

CII reported in November that 2017 set a record for IPOs with time-based sunset provisions that automatically convert the super-voting class to one share, one vote common stock. The six companies with these sunsets are Mulesoft (five years), Hamilton Lane (10 years), Alteryx (10 years), Okta (10 years), Stitch Fix (10 years), and Altair Engineering (12 years). The mean sunset for 2017 was 9.5 years, down from 10.3 years in 2016. CII [recommends](#) a sunset of three to five years for newly public companies that choose to adopt dual-class structures with unequal voting rights.

Although dual-class structures skew toward larger companies that comprised roughly half of the total IPO market capitalization in 2017, Snap and Altice witnessed significant price declines after their IPOs, lessening the market cap weight of dual-class firms among the new IPOs by year end. Still, the vast minority of newly public U.S. companies use these structures. By contrast, a third of FPI IPOs in 2017 had unequal voting structures, suggesting an attraction to U.S. exchanges like the NASDAQ and NYSE where governance standards are looser by international comparison.
