## **CII Publishes Investor Guide to Engagement on Cyber Risk**

**Washington, D.C., April 29, 2016** — As cyber attacks against companies escalate, cybersecurity has become a critical component of the board of directors' role in risk oversight. To help investors gauge whether public company boards are overseeing that risk effectively, the [Council of Institutional Investors](#) has published a shareholder guide, [Prioritizing Cybersecurity: Five Investor Questions for Portfolio Company Boards](#).

This short guide covers key topics ranging from the process by which the board evaluates the company's cybersecurity strategy to how it discloses cyber risks and related incidents.

For questions about the report, please contact CII Deputy Director Amy Borrus, [amy@cii.org](mailto:amy@cii.org).
